

Canopy course information 2012

Single Day Course

Cost: 110€

Course includes: 2 hop'n'pops from 7000ft/2100 m AGL
DVD of landings

Course outline: The single day course covers the basic theory necessary to understand canopy flight and improve the students skills. This day consists of course safety, basic aerodynamics and an introduction to a safe and effective landing profile. The student then makes a videoed evaluation jump. The second group of ground school modules covers flight planning and basic accuracy, canopy discipline, equipment and the landing sequence. The student then makes the second jump of the course, focusing on their flight plan and collecting information necessary for improved accuracy and consistency. All landings are filmed and fully de-briefed.

2 Day Course

Cost: 250€

Course includes: 6 hop'n'pops from 7000ft/2100 m AGL
DVD of landings

Course outline: After completion of the first day as above, the 2 day course consists of around 10 basic exercises that the student is asked to perform under their canopy. During the course the student will perform each exercise several times so each is fully understood. Further ground school modules are completed. All landings are filmed and fully de-briefed.

3 Day Course

Cost: 385€

Course includes: 10 hop'n'pops from 7000ft/2100 m AGL
DVD of landings

Course outline: After completion of the initial 2 days as above, the 3 day course consists of a further 10 basic exercises that the student is asked to perform under their canopy. As before, the student will perform each exercise several times so each is fully understood. Further ground school modules are completed. The student is also introduced to several more technical, but essential, in air exercises. All landings are filmed and fully de-briefed.
